

# STEELHACKS XI

September 28-29th

Pittsburgh, PA → Benedum Hall

# STEEL HACKS STEEL HACKS

SteelHacks is a weekend-long event where students from around the nation work together to build innovative technology products. Participants will have the opportunity to dream, design, and deliver technology products from scratch. In addition, we will offer mini-games, workshops, and meals for students to take a break from coding. SteelHacks is hosted by the Computer Science Club at Pitt and the Pitt School of Computing and Information.
